

SAP Business One® Sales mobile app

Sell smarter with SAP Business One Sales mobile app for iOS or Android, designed for busy sales teams on the move. Manage sales leads, customer accounts, view stock, and place an order.

View KPIs and sales reports

- Top 5 customers
- Top 5 best-selling items
- Orders and pipeline value

Manage sales opportunities

- Create new sales opportunities
- Update lead status
- View sales leads by industry or activity days

Manage customer accounts

- Create a new customer account
- Sort customers by order value, frequency, or account balance.
- Attach documents or special pricing to an account

Manage day-to-day activity

- View appointments and activities in a calendar
- Set up document folders and link related documents
- Check-in, remote worker safety feature

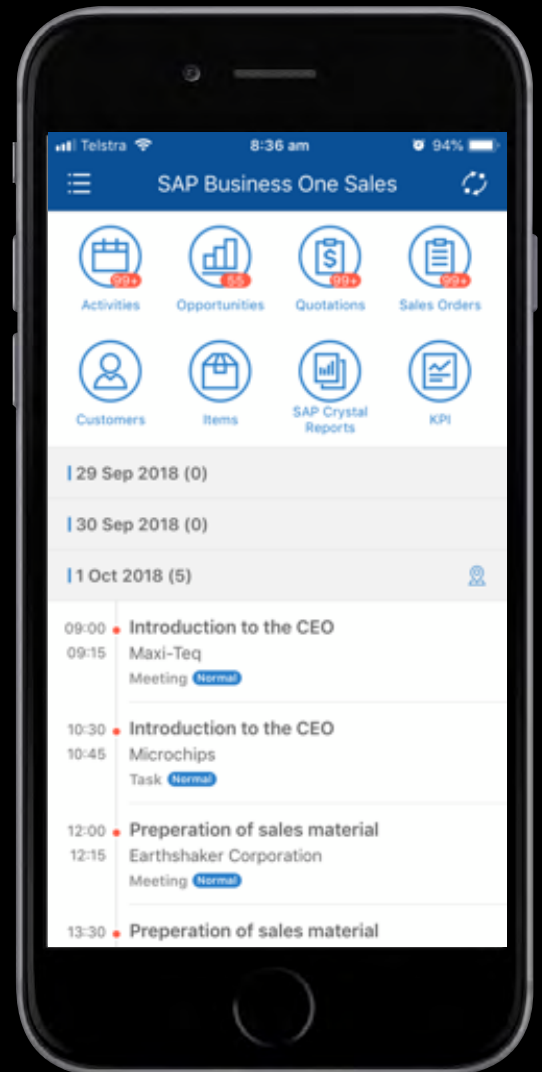

Stock levels

- Search and view stock inventory
- View unit price and quantity
- View quantity of an item by warehouse location

Manage orders

- Search for, create and cancel sales orders
- Update an existing sales order or quote
- Sort related documents by number, name or delivery date

To win in the digital economy, sales professionals need to maximize every customer engagement with instant access to the most relevant business information, wherever they are.
