

Drive profitable growth affordably and without complexity

Visibility into and control over your operations are a must in order to stay competitive. Now, with the OptiPro Cloud solution, they're **faster and easier to achieve** than ever. You get the latest functionality of the OptiPro application without the need to deploy on-premise software. So you get the support you need – and the simplicity of the cloud.

The OptiPro Cloud solution provides you with all the integrated business management functionality of the OptiPro ERP powered by SAP Business One application. The cloud-based solution helps you to streamline processes and increases visibility to improve operational efficiency and decision making.

OptiPro ERP Cloud is hosted on world class datacenters, allowing your company to benefit from the software while minimizing your IT investment.

Cloud Includes:

- Comprehensive, integrated functionality
- Transparent and affordable cost structure
- Automatic updates that deliver the benefits of ongoing innovations
- Ability to extend and deploy new functionality quickly.
- World-class security delivered by trusted partners

Benefits

- Streamline operations and increase business insight
- Reduce capital investment with a cloud-based solution
- Minimize IT overhead by eliminating the need to hire experienced IT staff
- Increase business agility by enabling a rapid response to new opportunities
