

Integrated, comprehensive financial management

As your small business or midsize company grows, so does the complexity of managing its financials. While accounting-only software may have helped you get started, you need software that can [take your business to the next level](#), automating everyday financial tasks and integrating them with other business processes. That software is available – in the [OptiPro ERP](#) application.

OptiPro powered by SAP Business One provides a complete set of tools to help manage and streamline your financial operation. It automates everyday accounting tasks such as maintaining ledger and journal entries, supporting tax calculations, and enabling multicurrency transactions.

You can conduct all your banking activities including processing bank statements and payments, as well as reconciling accounts. You can also manage cash flow, track budgets, and compare actuals versus plans to see where your business stands at a moment's notice.

By integrating your financial operation in real time with other business processes, such as purchasing and sales, you can speed transactions and improve visibility into cash flow.

The software provides comprehensive accounting and financial functionality, including:

- **Accounting** – Automatically handle all key accounting processes, such as journal entries, accounts receivable, and accounts payable
- **Controlling** – Accurately manage cash flow, track fixed assets, control budgets, and monitor project costs
- **Banking and reconciliation** – Quickly process reconciliations, bank statements, and payments by various methods including checks, cash, and bank transfer
- **Financial reporting and analysis** – Create standard or customized reports from real-time data for business planning and audit reviews
