

# Real-time Inventory and Warehouse management

Inventory represents one of the largest expenses for many small and midsize businesses. **Balancing accurate inventory management** with cost-effective inventory is crucial for delivering on promise and keeping customer satisfaction high. The OptiPro powered by SAP Business One application offers best-practice functionality to help you meet your inventory and warehouse management

OptiPro provides accurate information about inbound and outbound shipments, Inventory, and item location. You can value inventory using standard costing, moving average, FIFO, and other methods; monitor stock levels; and track transfers in real time. You can run real-time inventory updates and availability checks and manage standard and special pricing. You can also apply volume, cash, and customer discounts and run reports that reveal their impact.

The software's functionality supports:

- **Warehouse and inventory management** –

Manage inventories using various costing models, maintain item master data, and use multiple units of measure and pricing.

- **Bin location management** – Manage inventory by dividing each warehouse into multiple subzones, set up allocation rules, optimize stock movement, and reduce picking times

- **Goods receipt and issue control** – Record goods receipts and issues; track stock locations and transfers; enable consignment, drop-ship, and other orders; and perform inventory and cycle counts

- **Efficient reporting** – Generate reports with timely data and display them in various formats or dashboards
