All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates, and they should not be relied upon in making purchasing decisions.

For all recent and planned innovations, potential data protection and privacy features include simplified deletion of personal data, reporting of personal data to an identified data subject, restricted access to personal data, masking of personal data, read access logging to special categories of personal data, change logging of personal data, and consent management mechanisms.

About SAP road maps

Companies today are planning their digital journeys – transforming business models, reengineering business processes, and reimagining work.

SAP road maps highlight innovations that may help you plan and implement your digital journey. They span products relevant to lines of business in your industry and explain how our innovations may add value to your business.

In our road maps, you can learn about our innovations along four different timelines:

1. **Recent innovations** for our products that have been launched in the past weeks or months and can already be purchased
2. **Planned innovations** for our products that are intended to be launched in the short term or midterm
3. **Product direction**, providing a long-term perspective on high-level development plans for innovations for our solutions – inspired by your requirements
4. **Product vision**, providing a high-level and long-term business perspective on innovations for our products

- Key trends and customer needs
- Road map overview and major product updates

Product road map

- Recent innovations
- Planned innovations
- Product direction

Our technology strategy is aligned to enable customers to become intelligent and sustainable enterprises

To successfully execute on our strategy and safeguard customer success, we must ensure that we have not only the right components to support intelligent and sustainable enterprises (applications, platform, and intelligent technologies) but also the right technology strategy for these components to work in concert with one another.

Our technology strategy will focus on these pillars:

Consumer-grade experience

Make sure that the business user's experience is as good as with consumer applications

Powerful platform

Drive ecosystem growth by enhancing and publishing APIs, embracing diverse developer frameworks

Built-in integration

Enable integrations with little or no effort to other SAP and third-party applications

Cloud

Enable applications to run smoothly in the cloud by detaching the applications from the underlying infrastructure

Applied intelligence

Embed artificial intelligence (AI), machine learning (ML), the Internet of Things (IoT), and advanced analytics technology to create business value

“SAP Business One is a centerpiece of SAP’s midmarket strategy, and therefore we are strategically investing into the product. We are making SAP Business One fit for the next generation, for the next decade, by enabling SAP digital services and SAP Business Technology Platform so the digital transformation can be done with SAP Business One.”

Rainer Zinow, SVP, Head of SAP Midmarket Product Management, SAP SE
August 2022

SAP Business One

SAP's best-selling ERP solution by number of customers

Used by **75,000+** customers, with **1.2+** million users

Available as **50** country localizations and in **28** languages

~300 partners with **500+** solutions

Implemented by more than **850** value-added resellers worldwide

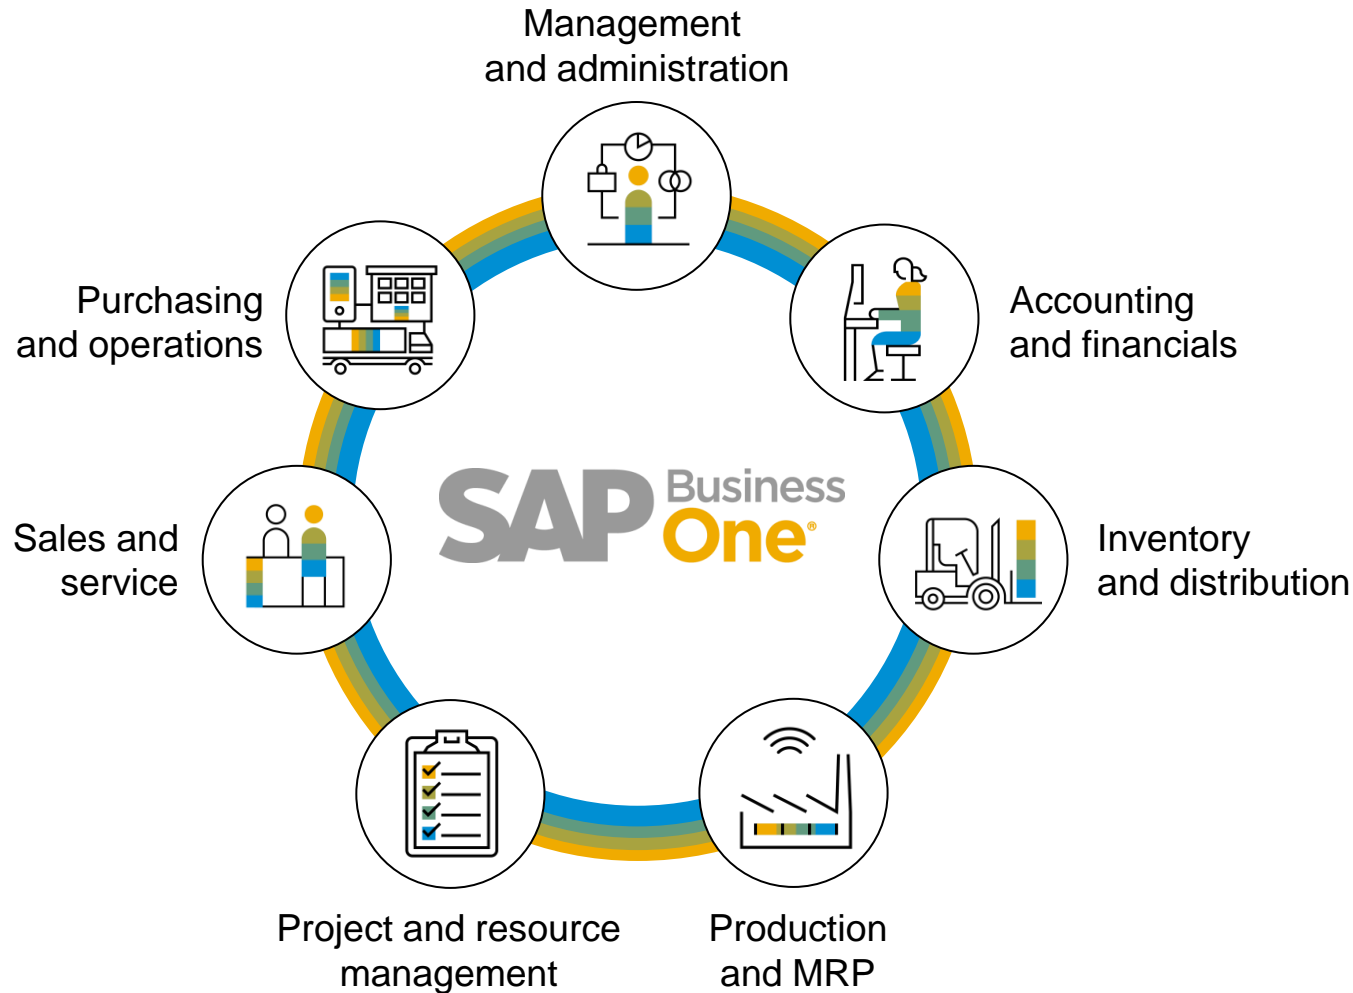

SAP Business One used in **>170** countries

360+ large enterprises running SAP Business One in **7,000+** subsidiaries

SAP Business One

Digital platform for small and midsize enterprises (SMEs)

Facts and figures:

>75,000 customers

50 country localizations and 28 languages

~300 partners with >500 solutions

850 value-added resellers that implement worldwide

Used in >170 countries

>7,000 subsidiaries running SAP Business One

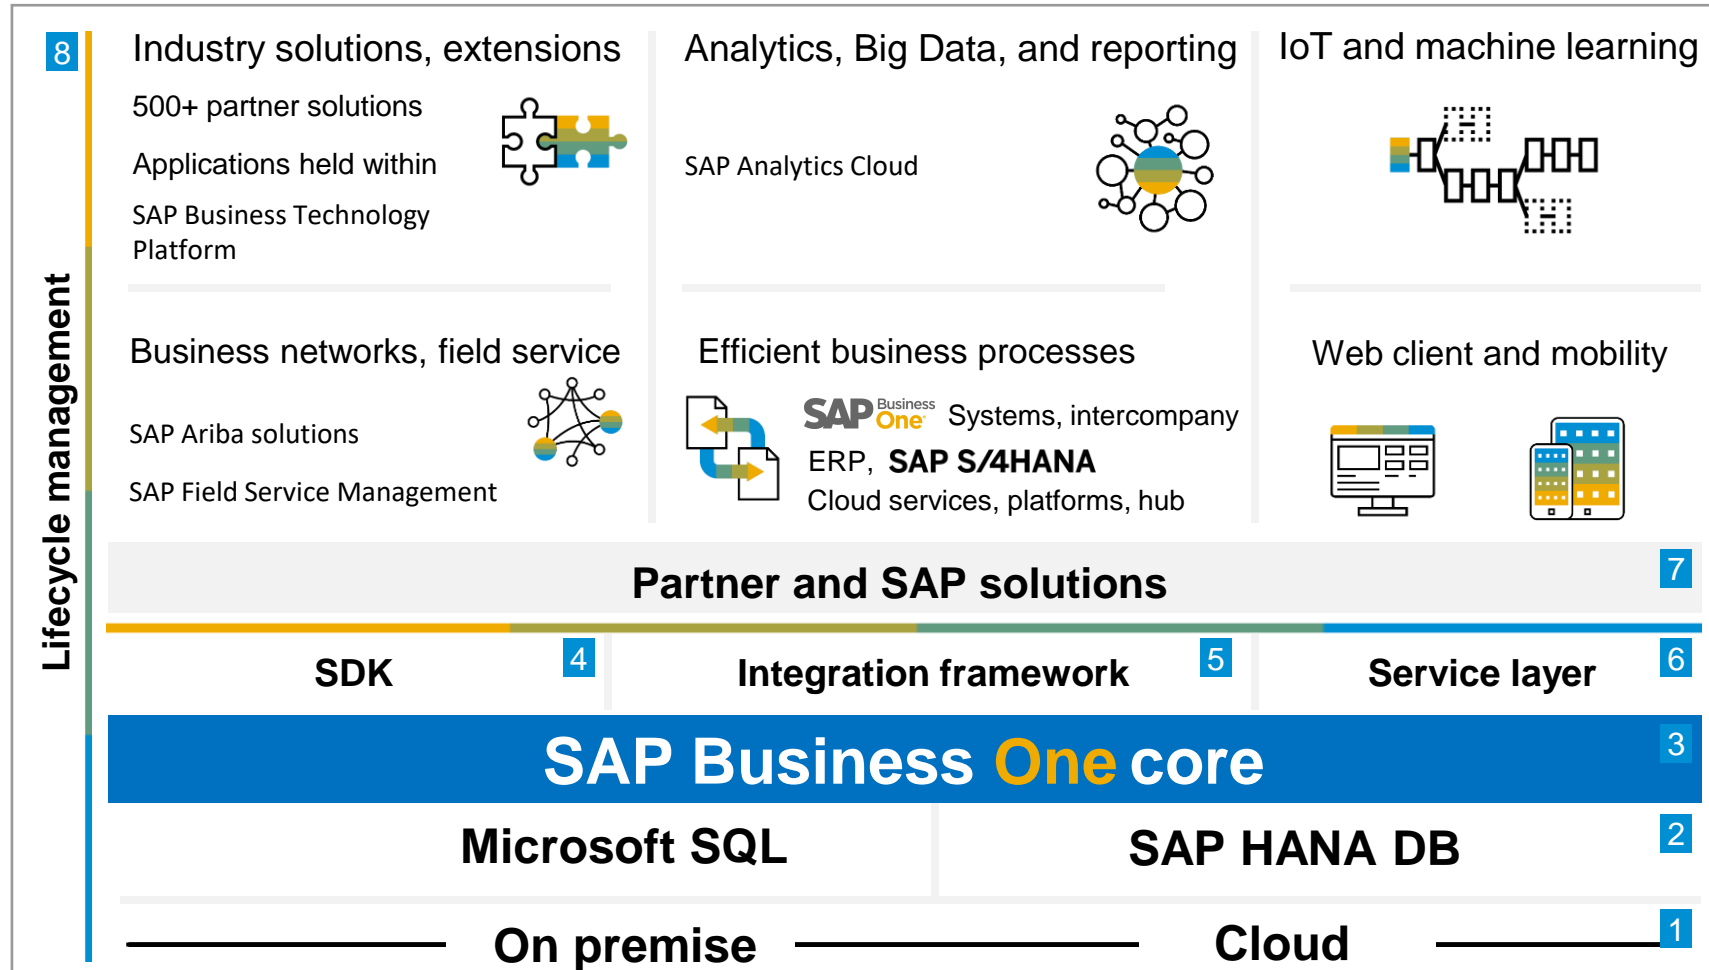

The digital core for SMEs

Enhanced by the digital enablers

SAP Business One solution stack

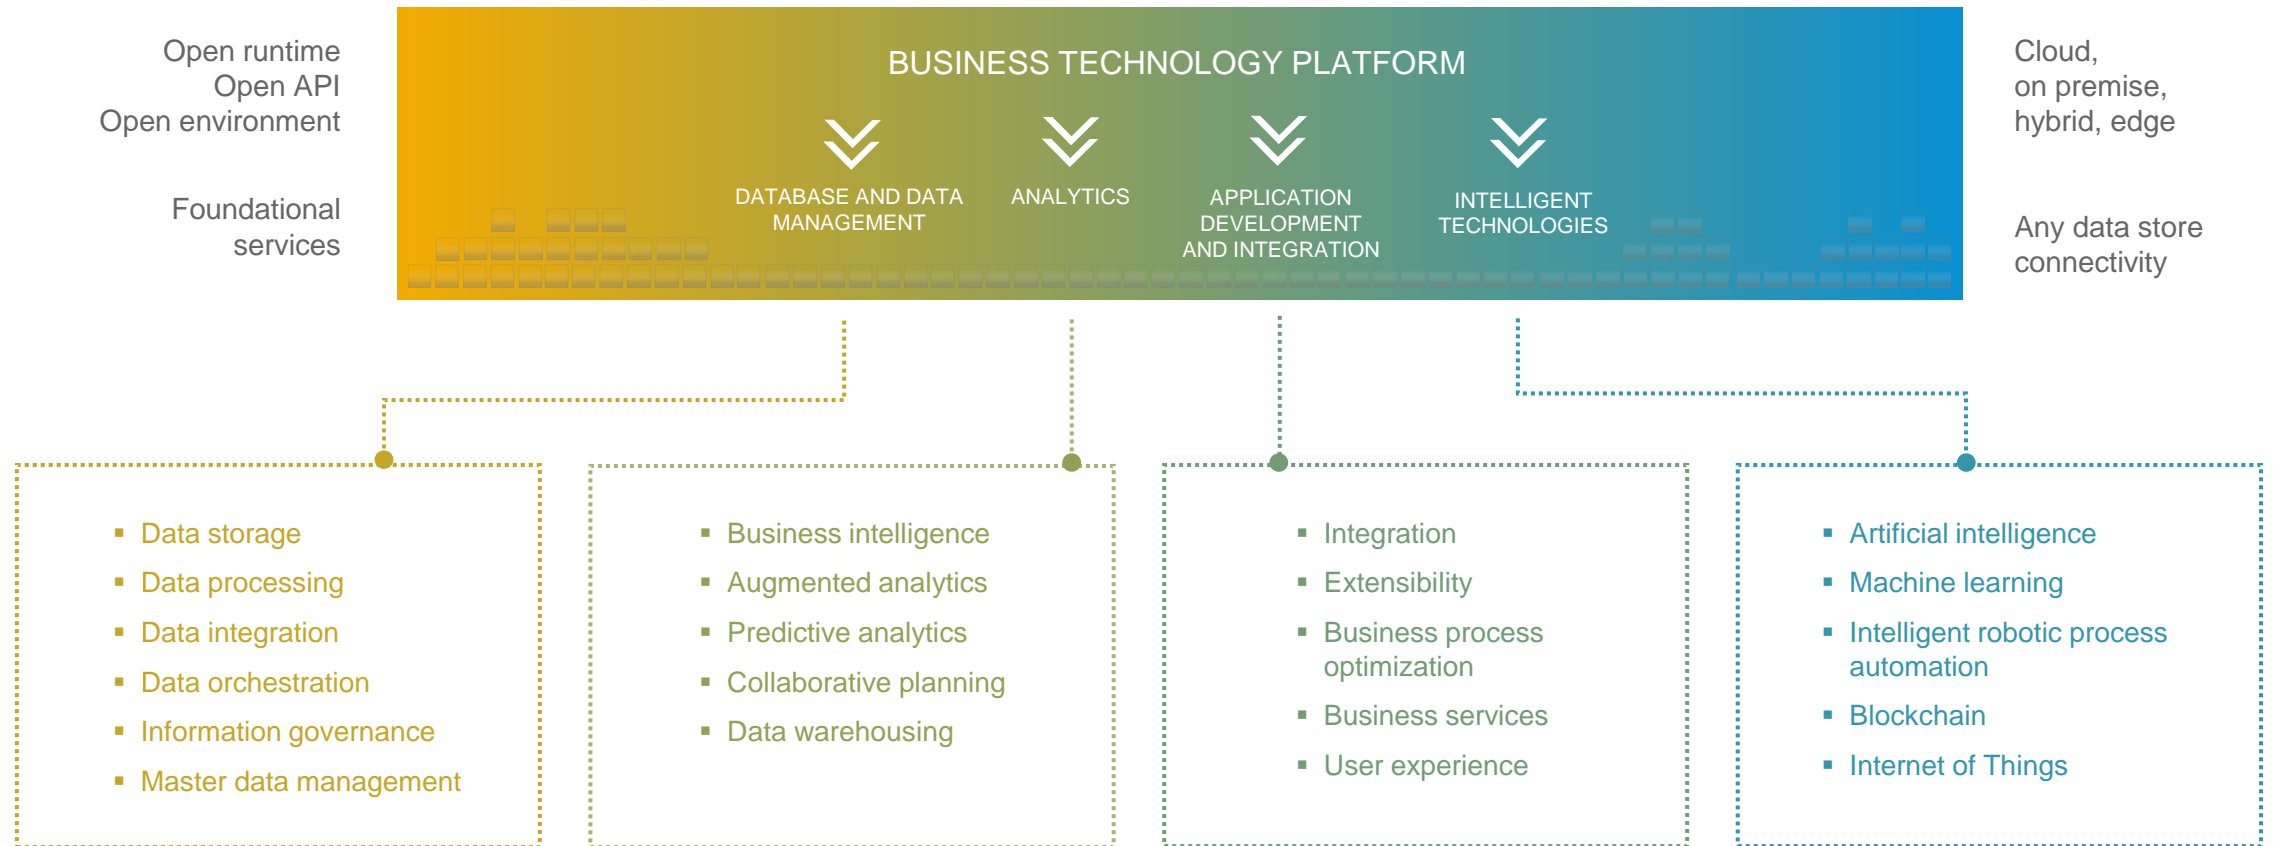

Customer needs and the value propositions of the product

- 1 Full deployment flexibility
- 2 Runs on in-memory technology
- 3 All standard business processes covered
- 4 Basic application programming interfaces (APIs)
- 5 Robust integration and collaboration
- 6 Interface for SAP HANA and Microsoft SQL applications
- 7 Extends the solution scope based on extensibility layer
- 8 Low cost of ownership and efficient support

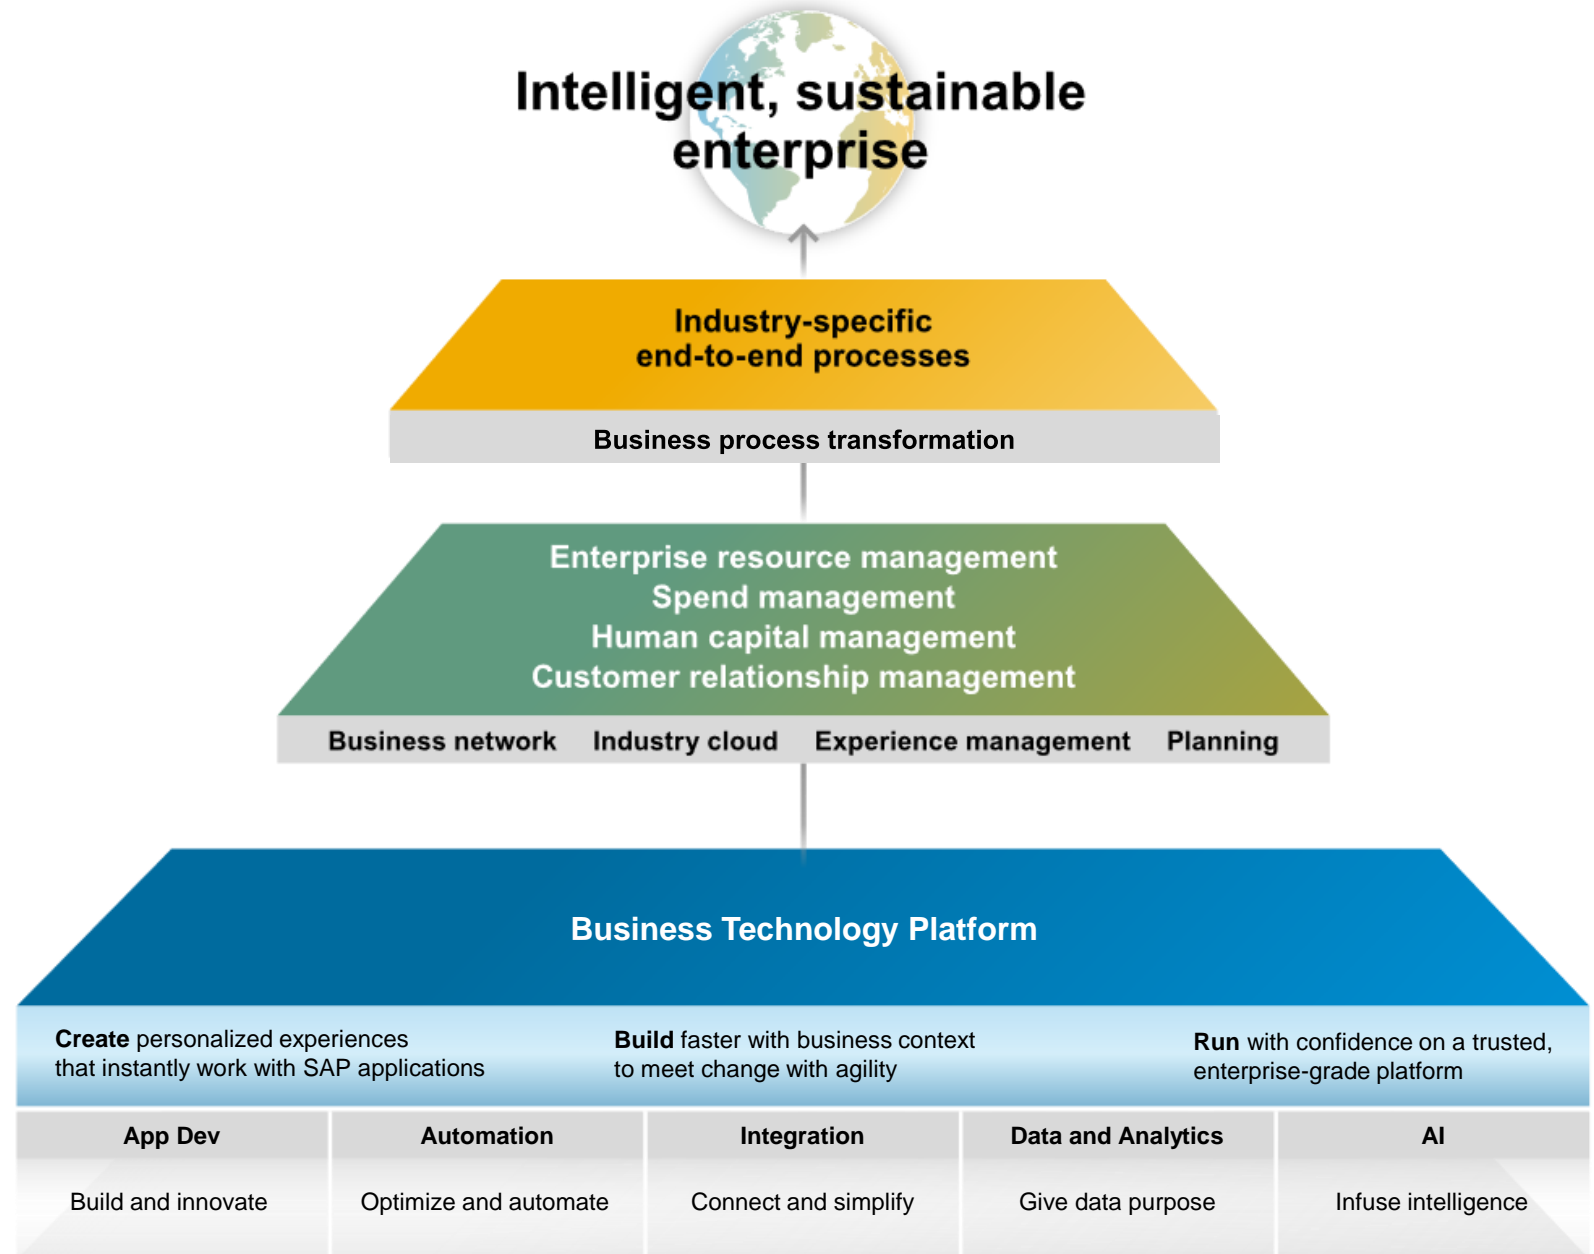

SAP Intelligent Enterprise Framework

Business technology platform (BTP) – **business process intelligence**

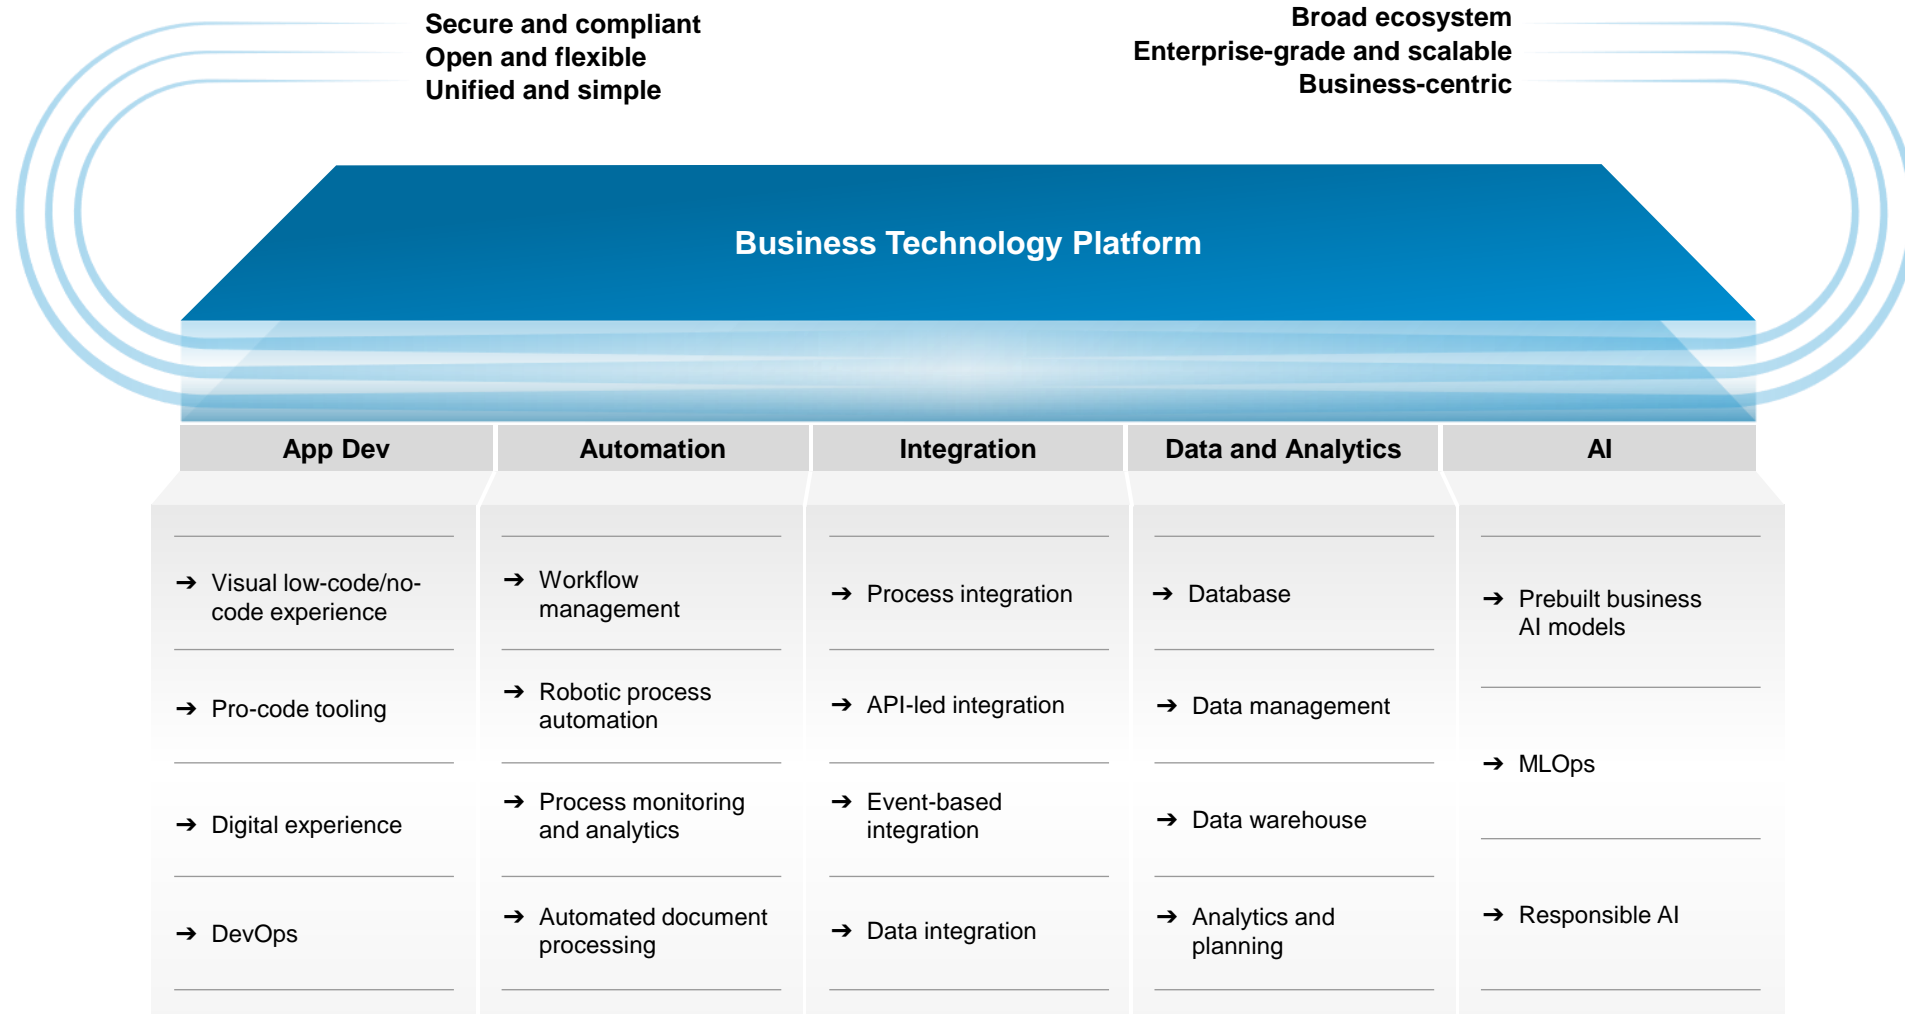

Allows you to use advanced technologies to simplify and automate processes, and adapt business models

SAP BTP is the foundation of the intelligent, sustainable enterprise

SAP BTP – cloud capabilities

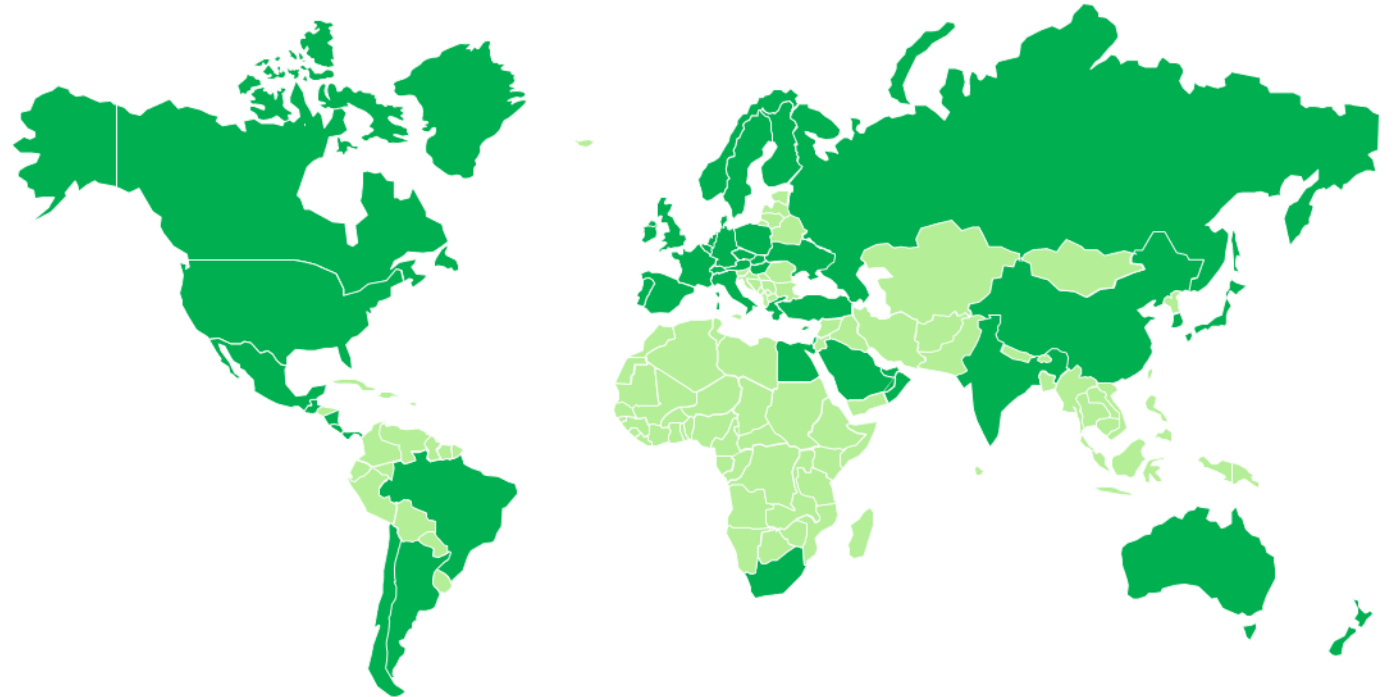

SAP Business One used in more than 170 countries

Master the challenge of globalization in your business

Current localizations (50)

Argentina	Finland	Mexico	Slovakia
Australia	France	Netherlands	South Africa
Austria	Germany	New Zealand	South Korea
Belgium	Greece	Norway	Spain
Brazil	Guatemala	Oman	Sweden
Canada	Hong Kong, China	Panama	Switzerland
Chile	Hungary	Poland	Turkey
China	India	Portugal	Ukraine
Costa Rica	Ireland	Puerto Rico	United Arab Emirates
Cyprus	Israel	Qatar	United Kingdom
Czech Republic	Italy	Russia	United States
Denmark	Japan	Saudi Arabia	
Egypt	Lebanon	Singapore	

Countries making use of localizations

Customers in more than 120 countries use localization of other countries, own customization, or partner solution.

Current system languages (28):*

Arabic, Chinese (simplified/traditional), Czech, Danish, Dutch, English (UK/U.S.), Finnish, French, German, Greek, Hebrew, Hungarian, Italian, Japanese, Korean, Norwegian, Polish, Portuguese (Brazil), Portuguese, Russian, Slovak, Spanish (Latin America), Spanish, Swedish, Turkish, and Ukrainian

*Convenient option to make additional languages available is using a partner solution (for some countries bundled with functional add-ons) or to define customer-specific UI terms using the custom language tool as detailed in SAP Note [1757764](#).

SAP Business One

Product areas of future investment

Vision: Strengthen SAP Business One as the right ERP for SMEs in the digital economy, offering flexible deployment models, a solid global business core, and leading user experience

Global and highly scalable real-time ERP

Provide a highly competitive solution, attractive maintenance model, enhanced localizations, and continuous improvements

Customer value in the digital economy

Transform flexible technology and innovations into customer value at low TCO; support fast adoption to new business models, customer growth, and intuitive Web client design

Full commitment on SAP HANA

Leverage exclusive advantages and capabilities of SAP HANA

Intuitive partner co-innovation and customization

Adopt integration framework 2.0, offer advanced developer experience on the service layer, including new design concepts, APIs, objects, and tools

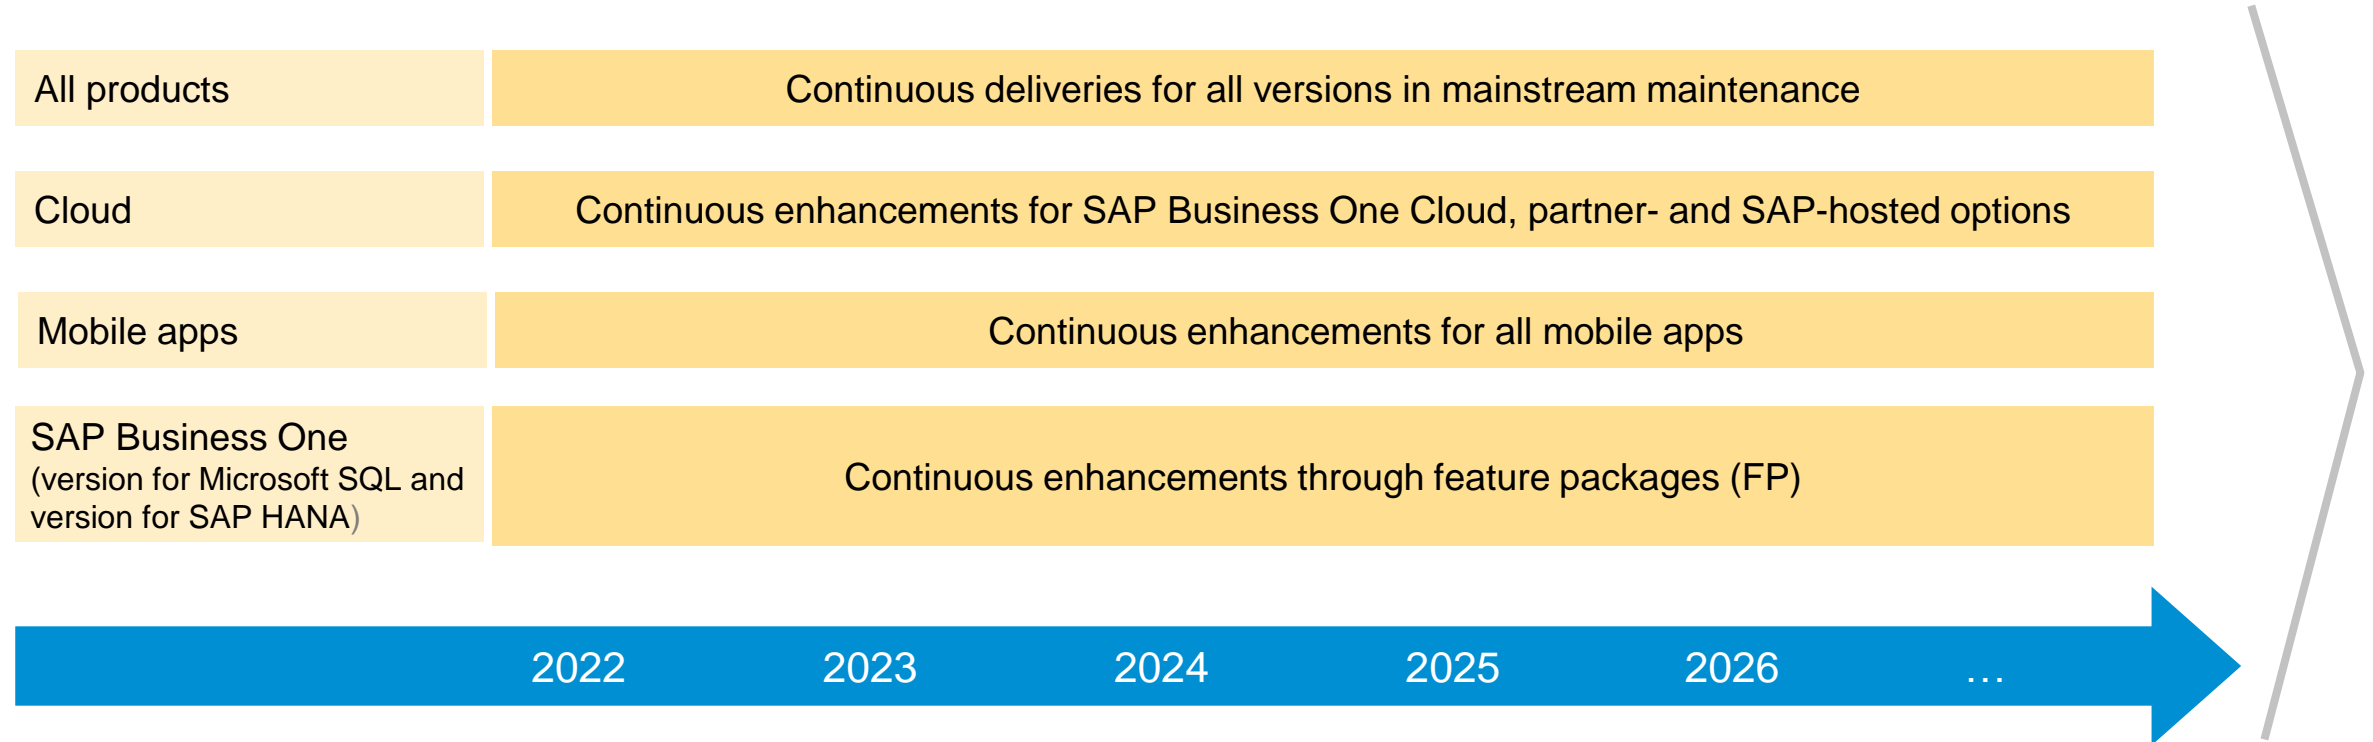

Straightforward consumption – cloud, on premise, and mobile

Accelerate the cloud transformation and drive mobile adoption; offer maximum flexibility, low complexity, and best control of the business for customers

This is the current state of planning and may be changed by SAP at any time.

SAP Business One releases and related products

Solid product road map with continuous innovation*

Schematic illustration of major deliveries

The latest SAP Business One release planning details are always available in SAP Notes: <https://launchpad.support.sap.com/#/notes/2267770>

*This is the current state of planning and may be changed by SAP at any time.

High-level release story of SAP Business One, version 10

Version 10 focuses on ease of use and operation in the cloud. With its new or enhanced features and further ways to extend and integrate, it brings unprecedented value to customers and partners. This makes companies truly intelligent enterprises. The new technologies and processes allow for completely new and improved business models.

- The release **adds value by functions**, such as completed and new localizations and refined features, as well as by supporting cutting-edge technology such as SAP HANA 2.0, machine learning, and new analytical capabilities.
- The **user experience** is boosted by a new Web client, based on the intuitive SAP Fiori design system.
- The unique selling proposition of a **powerful and intuitive integration** is also significantly enhanced by major improvements in the **integration framework 2.0** and by additional **predefined integration scenarios**.

The logo for SAP Business One Version 10. 'SAP' is in a large, bold, grey sans-serif font. 'Business One' is in a smaller, grey sans-serif font, with 'One' in a bright yellow color. 'Version 10' is in a large, bold, grey sans-serif font below the main text.

Web client for SAP Business One: The best of all worlds

Business processes coverage

Sales and purchasing documents

CRM, service, and time sheet

Payments and journal entries

Items and business partners master data

Inventory documents and bill of material

Document drafts and approval process

Sophisticated analytics capabilities

Integration and extensibility

Microsoft 365 One Drive Export (Excel, Word)

Collaboration using Microsoft Teams

E-mail using Outlook 365

Basic extensibility

SAP Companion (Web assistant) adoption

Web client for SAP Business One: Analytics

List view: Object-centered analytics

Take advantage of sophisticated filtering and visualization capabilities for deriving and presenting the data you need in every object list view

General overview: Gathering multiple data sources

Design cards based on any list view, analytical chart, user-defined objects and tables, or user-defined query, showing the data you need from various aspects

User-defined queries (UDQs)

Manage, create, edit, and preview UDQs; presented as standard list view and can be leveraged as a data source for cards on general overview

Linked views: Contextual analytics

Assign any view, general overview, or UDQ to any object to derive record-specific data

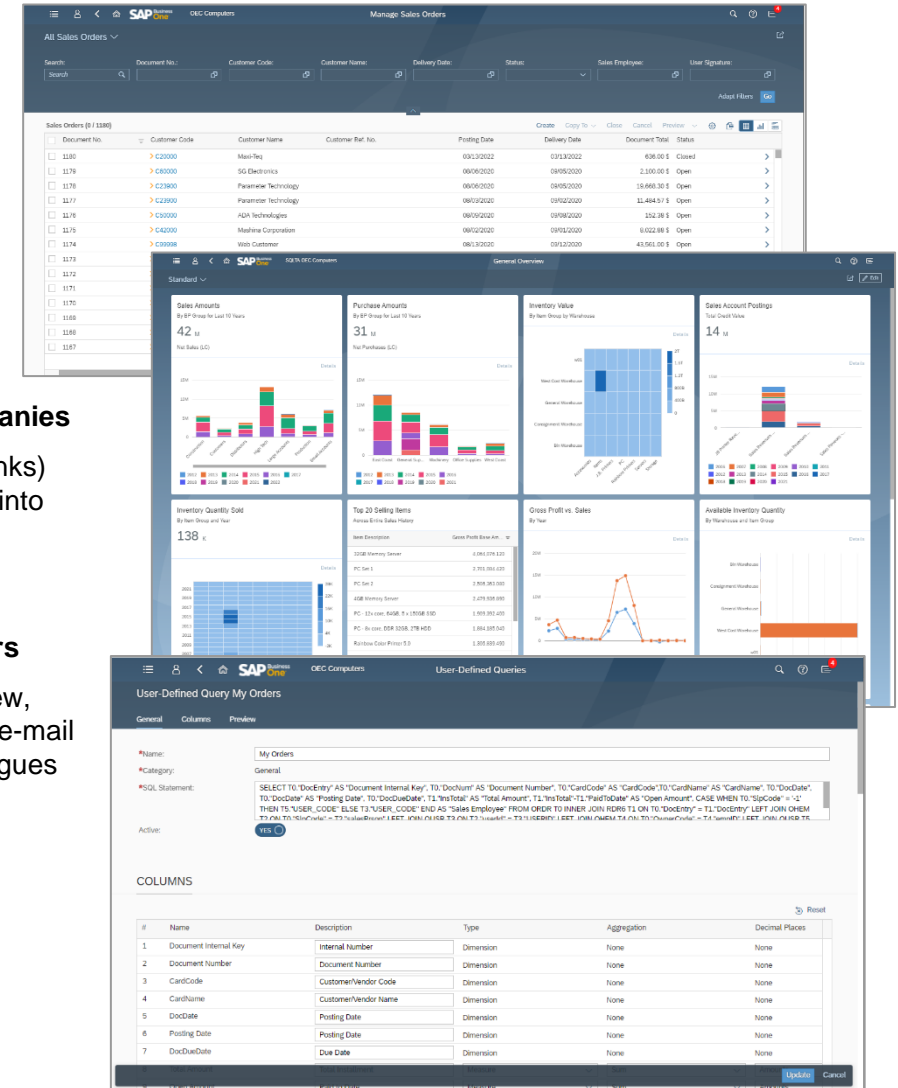

Export and import views: Collaborating across companies

Export selected views (and links) to a file that can be imported into other company databases

Sharing by e-mail: Collaborating between users

Embed a direct link to any view, general overview, or UDQ in e-mail body and send to your colleagues

SAP Product Footprint Management for clean operations

Determine, assess, and optimize the carbon footprint of individual products to advance your wider sustainability goals

Objective

SAP Product Footprint Management for clean operations is a stand-alone (yet readily integrated) **cloud-native sustainable solution for small and midsize businesses** to quickly and traceably estimate a bottom-up carbon footprint at the individual product level.

Capabilities

The solution streamlines and simplifies carbon management, from raw materials and production to consumption, waste prevention, and recycling, so you can:

- Achieve truly sustainable profitability by balancing the economic and ecological efficiency of products
- More easily produce auditable carbon figures for tenders, framework agreements, and contracting, as well as for customer, employee, and investor relations
- Gain actionable insights and decision-making support to help reduce your company's carbon footprint over time

Technology

- SAP Business Technology Platform

Benefits

Quick to implement and user friendly with low recurring effort for periodic data entry

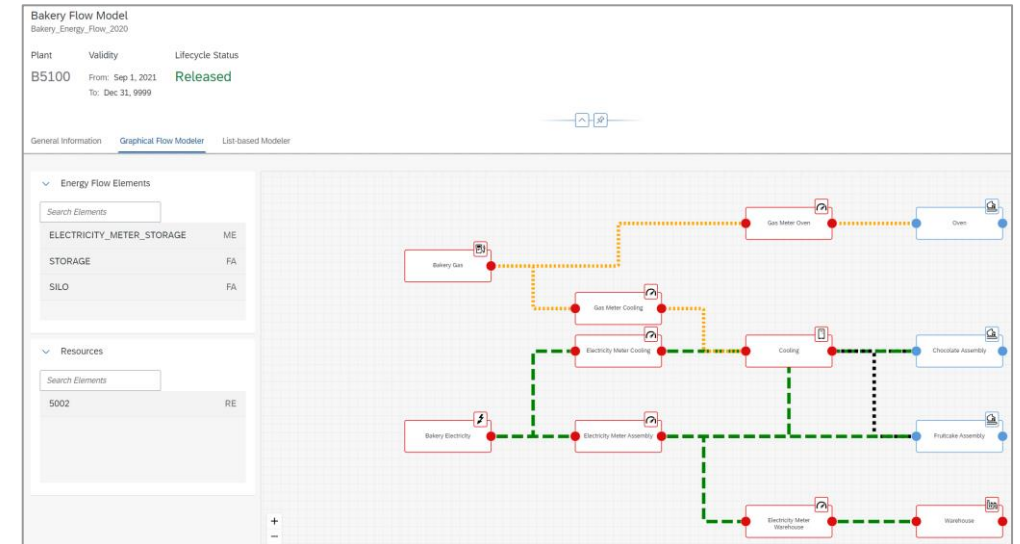

Especially valuable for manufacturing and product-centric businesses from regions with high carbon pricing

Smooth integration with SAP Business One

https://partneredge.sap.com/en/solutions/sustainability/about/zero_em.html

In a nutshell

The SAP Product Footprint Management solution for clean operations gives manufacturing and product-centric companies quick, actionable insights into the carbon footprint of individual products so you can:

- Make informed product portfolio, investment, procurement, and other business decisions
- Improve the eco-efficiency of your operations with fewer resources
- More easily and transparently communicate your environmental impact to investors, customers, consumers, and employees

Identity and authentication management (IAM)

Sign in to SAP Business One and supported components with your identity provider user

- Single sign-on (SSO) experience
- Enhanced security and reducing potential attack surface
- One-stop shop for user management actions across SAP Business One company databases
- No need to remember multiple passwords

FP 2208* enables you to sign in using IAM to the following components:

- SAP Business One desktop client
- SAP Business One Web client
- System landscape directory
- License service
- Service layer
- DI API
- Extension manager
- Job service
- Mobile service (except for touch ID for Android)
- Analytics platform
- API gateway service
- Outlook integration server
- Excel report and interactive analysis
- Data transfer workbench (DTW)
- Microsoft 365 integration

In FP 2208, the IAM service is not supported by the corresponding SAP Business One Cloud version; this is planned for future SAP Business One Cloud versions.

*With FP 2208, it is possible to register only AD FS or Azure Active Directory as external identity providers in OpenID Connect (OIDC).

SAP Business One 10.0, FP 2208: Key highlights (1/6)

Web client

Support for sales documents: Purchase requests, quotations, orders, deliveries, returns, return requests, A/R invoices, A/R reserve invoices, and A/R credit memos

Support for opportunities

Packing slip support

Support for purchasing documents: quotations, orders, goods receipt POs, goods return, goods return requests, A/P invoices, A/P reserve invoices, and A/P credit memo*

Outgoing SnB/Bin location selection

Support for service calls and solution knowledge base

Relationship map

Approval process and drafts incl. approvers

Support for business partner (BP) and item master data

BP catalog number and bar code support

Multiple branches

Freight charges

Exchange rate entry

Authorizations and data ownership

Incoming and outgoing payments

Support for activities and notifications

Support Inventory documents: Goods issue, goods receipts support, and inventory counting

Bill of materials (BOM) support

Journal entry support

Equipment card and service contract support

Support for alternative items

Time sheet

Extension of localization support

Advanced analytics content and editor incl. import and export

User-defined queries

Linked list views

Enterprise search

SAP HANA®

Supported on SAP HANA and Microsoft SQL database servers

Support for single sign-on (SSO)

Customizable home page

Flexible list views

Support for 28 display languages

Support for message preferences

High-contrast UI theme and Horizon theme support

Attachment management

SAP Companion adoption

Microsoft 365 integration to One Drive (Excel, Word)

Outlook 365 integration

Microsoft Teams integration

Business card scanning with Document Information Extraction service

Support for KPI tiles

Support for APIs for new views

Support for “Display in menu” setting for UDTs

User-defined fields, tables, and objects

VSCODE plug-ins (URL mashup, apps), iFrame as a tile support

* Certain A/P documents supported in read-only for India

SAP Business One 10.0, FP 2208: Key highlights (2/6)

Localizations | Legal compliance

EU PEPPOL electronic invoicing support

Support for external VAT calc. in more localizations*

Multiple branches in year-end closing for all locs.

Create quick response (QR) codes in documents

Inventory valuation simulation report for all locs.

Fraud prevention headers version 3.0 (MTD) support for the UK

Electronic document framework enhancements

Electronic documents service enhancements

Support for reference documents through Data Interface (DI) API

Helping ensure legal compliance and additional data protection and privacy (DPP) tools

Chart of accounts migration wizard for Portugal

One-stop-shop reporting for the EU

E-books incl. online sales reporting and expense classification enhancements for Greece

Bank statement processing enablement for Japan

Tax setup APIs for Brazil

Electronic invoice CFDI 4.0 enhancements for Mexico

Mass UUID import for purchasing documents – Mexico

EU and country-specific (ES) Intrastat enhancements

Withholding retention calculation on documents for Argentina

Down payment invoice tax calculation enhancement for the United States and Canada

Qualified invoice method for Japan

E-checks support for Argentina

Electronic invoice enhancement 2022 for Italy

Nota fiscal eletrônica (NF-e) 4.0 electronic invoicing for Brazil

XRechnung e-invoices for Germany

Online VAT ID validation for the EU

Tax collection at source (TCS) on sales of goods for India

Bank statement processing (BSP) balance validation

Audit file (FEC) enhancements for France

Withholding tax enhancements for Mexico

Certificazione Unica enhancements for Italy

Online invoicing enhancements for Hungary

EU Sales Report and Report 349 enhancements for Spain

Form 1099 – NEC for the United States

SAP Crystal Reports layouts for Switzerland

E-billing (incl. bulk) and E- Way Bill enhancements for India

QR code on A/R invoice for Argentina and Portugal

ISO 3166 country codes support

SAF-T Tax Report for Norway

Series enhancements for period-end closing, exchange rate, and conversion rate differences

Folio enhancements for Chile

Electronic documents ATCUD for Portugal

Cargo tracking and tracing enhancements (EU)

Avalara tax service support (US)

*All localizations supported except Israel

SAP Business One 10.0, FP 2208: Key highlights (3/6)

Inventory | Distribution | Production

Serial and batch numbers mgmt. enhancements

Ability to change unit of measure (UoM) group of an item

Additional authorization groups for price lists

Item group name extended to 100 characters

Support for setting UoM group as inactive

Reverse and forward serial/batch no. trace report

FIFO layers report by consumption order

Updated item description applied to BOM

Drill-down from BOM to item master data

Inventory counting enhancements

Extending field length of item description and industry

Modifying remarks and UDFs in closed production orders

Support for mass deletion of BOM

Disabling of duplicate bar codes when duplicating items

Procurement confirmation wizard based on production orders

Changing status of sales/purchase type in item master data

Opening last prices report through item master data

Displaying preferred vendor name in item master data

Default catalog number for item

Support for bill of materials in attachments

Integration with SAP Product Footprint Management solution for clean operations

Financial management

Drill-down to G/L accounts in financial reports

Posting periods enhancements

Journal entry remarks extended to 254 characters

Financial enhancements

System messages before adding journal entries

Extended journal entry references

Updated journal entries with locked posting periods

Better printing preferences for payments and deposits

Report refresh enablement

Management of change log for exchange rates

IFRS postings for fixed assets

Tax code determination enhancements in procurement process

SAP Business One 10.0, FP 2208: Key highlights (4/6)

Sales | Purchasing | Service

Allowing update due date in part. reconciled invoices

Backorder report enhancements

“Add and view” and “Add and close” in A/R and A/P docs

Printing service calls and contacts

Hiding blank lines in addresses

Proc. confirmation wizard support for gross and net modes

Opening item list enhancements

Enabling updating UDFs in closed documents

Setting problem types, call status, and more as “Active”

Flexible default “Valid until” date in sales quotation

Linking same equipment card to multiple BPs

New document status “Open e-mailed”

Store price list no. and name in marketing documents rows

Extended business partner effective price sources

Ability to hide document remarks

Copy attachment paths to target documents

Cancellations of return requests

Displaying item description in alternative items window

Updating consolidating business partner and consolidation type at document level

Document reference enhancement

Customer and vendor reference number enhancement

Document information extraction integration enhancement incl. service-type document support

Display pf sales document in procurement wizard if target document is canceled

Relationship map support for reference documents and opportunity

Blanket agreement fulfillment reporting enhancements

Moving rows in marketing documents

CRM

Customer and vendor group name extended to 100 characters

Viewing and updating address UDFs in docs, service calls, and address format setup

Support for filtering activity reports by UDFs

Link between contact person and BP address

Hiding inactive contact persons in BP master data

Currency display enhancement in BP master data

Configuring display of employee name

Telephone field extended to 50 characters

Foreign name field extended to 200 characters

Project management

Interactive Gantt chart

Sorting order for project stages

SAP Business One 10.0, FP 2208: Key highlights (5/6)

Administration

Enhancements in document printing

Reference documents enhancements

Support for attachments tab in additional objects

Deleting live collaboration history by date range

Enhancements in approval process

Tab-level authorizations in BP and item master data

Hiding employee no. to support DPP

Setting warning for single-user validation

Recurring transaction templates enhancements

Deactivation of shipping types

Hiding locked users

Enhanced user removal management

Open users – set up form in “Find” mode

Messages and alerts cleanup tool

Easier access to authorizations and license

Support for “Find next” function in authorizations form

Manual determination of path in general settings

Change log enhancement

Adding detailed errors for license imports

Enhancing license balloon appearance

Main menu form settings for indirect access users

Determining paths in general settings manually

Change in “Find next” rule in form settings

Sort forms in user interface configuration template

Change log entries for authorization user groups

Authorization to use “Copy table”

Authorizations for duplicate documents and records

Support for "Hide BOM in component" in SAP Crystal Reports layouts

Support for greater number of characters in user password

Enhanced copy of single form settings

Authorizations in payments draft report

Adding authorization to “Remove opportunity”

Increasing no. of authorization groups

Allowing change log to read-only documents

Support for ability to retrieve a default value of an SAP Crystal Reports parameter

Enhancements to report and layout manager

BP payment terms without price lists

Approval process enhancements

Change log enhancements for employee master data

Attachment settings enhancements

Managing change log for system setup entries

New authorizations to time sheet

Providing parameters for dunning letters in SAP Crystal Reports layouts

SAP Business One 10.0, FP 2208: Key highlights (6/6)

Platform | Extensibility

- SAP HANA 2.0 platform adoption **SAP HANA®**
- Support for SUSE Linux Enterprise Server 15 **SAP HANA®**
- Service layer configuration UI **SAP HANA®**
- Service layer supports Microsoft SQL database server
- Service layer support for views on Microsoft SQL
- Formatted search supports multiple triggers
- Extending UDF support to additional objects
- Microsoft 365 integration
- Increasing menu item limit to 2,000
- Extend DI API and service layer coverage
- API access for CR reports
- Integration hub
- Security enhancements
- Support for Microsoft SQL 2019

- Extending service layer coverage
- Linking UDFs to system forms and UDOs
- Enable DI access to system permissions
- Support for Visual Studio 2019 with SAP Business One studio
- Enhancing UI API error handling
- Support for queries through service layer
- Adding queries to menus
- Sizing guide for service layer
- Unification of installation and upgrade packages for SAP Business One
- Query manager enhancements
- Support for SAP Crystal Reports 2020 SP2
- Identity and authentication management introduction
- Checkbox type for user-defined field

Usability

- New skin style **SAP HANA®**
- Enhanced user interface
- User name in license and add-on administration
- Support for 4K monitors **SAP HANA®**
- Revised SAP Fiori UI for Service and Sales mobile app

Lifecycle management | Cloud

- 64-bit support only
- Support for version 10 in cloud control center*
- Service unit to host multiple reseller operators*
- Security compliance enhancements incl. add-ons
- User and license enhancements
- High availability for SAP Business One, version for SAP HANA ,10.0
- Tenant configurator enhancements
- Documentation from product software installation moved to SAP Help Portal

* Delivered through SAP Business One Cloud 1.1, patch level 16

SAP Business One

Product road map overview – Key themes and capabilities

Recent innovations

Core

- Web client extended sales, purchasing, service, inventory, and analytics functionality
- Continuous innovations based on market feedback (Customer Influence)
- Integration to SAP Product Footprint Management solution for clean operations
- Document Information Extraction service integration (purchase invoice scanning and business cards scanning)
- Enabling workflow integration with SAP Business One based on SAP Build Process Automation solution bots with SAP-delivered scenario "return request" workflow
- Enabling document templates with SAP Build Process Automation for SAP Business One
- Microsoft Teams integration

Globalization

- Electronic documents service enhancements
- EU cargo tracking and tracing
- Japan – Qualified invoice method support
- India – E-billing invoice and e-waybill enhancements
- Japan – Bank statement processing enablement

Analytics

- Innovations based on SAP HANA

Mobile

- Service and sales apps update for Microsoft SQL Server, iOS, and Android

Extensibility and platform

- Identity and authentication management introduction
- Enhanced service layer API
- SAP Crystal Reports API
- Microsoft 365 integration (Word, Excel, OneDrive)
- Service layer supporting Microsoft SQL

Cloud

- Tenant configuration wizard
- Cloud infrastructure optimization
- Dockerized version of SAP Business One integration (iPaaS)

Planned innovations¹

Core

- Web client extended sales, purchasing, payments, service, financials, production, inventory, and analytics functionality
- Continuous innovations based on market feedback (Customer Influence)
- Intelligent ERP elements adoption, such as enabling document templates for intelligent invoice scanning in SAP Business One
- Outlook 365 integration enhancements
- Microsoft Teams integration enhancements

Globalization

- Electronic documents service enhancements
- Electronic documents certificate management enhancements
- Integration to the digital compliance platform from SAP
- Germany – ELSTER: Adoption of new ERIC versions
- India – A/P down payment request support for TDS deduction
- Israel – Electronic invoice and digital signature support
- Israel – Purchase tax on document rows introduction
- Israel – Maarechet 1000 and Mivzak reporting changes
- Poland – Electronic invoice 2024 (KSeF)
- France – Electronic invoice support
- Greece - E-books stamp duty support enhancements
- Singapore – Submission of GST return
- Spain – Support for new tax for one-use plastics
- Argentina – Electronic invoice enhancements
- QR code formula builder

Extensibility and platform

- Enhanced service layer API
- Web client extensibility
- Windows 11 support

Cloud

- Enhanced identity and authentication management introduction

Product direction¹

Core

- Extended Web client business process coverage incl. administration
- Continuous innovations based on market feedback (Customer Influence)
- Optimized scalability and performance
- Simplification of landscape and deployment, support for containerization approach

Globalization

- Enhancement of existing markets and regions
- Integrations to electronic fiscal services
- IFRS compliance

Analytics

- Insight to action (data mining)
- Predictive, pervasive, and scalable
- Built-in content

Mobile

- Continuous innovations based on market feedback

Extensibility and platform

- Enhanced service layer API
- Enhanced Web client extensibility
- Event service support

Cloud

- Reduction of TCO

1. This is the current state of planning and may be changed by SAP at any time without notice.

Planned innovations: Core

Global, highly scalable real-time ERP

Feature

Optimize core business processes and continuously delivering enhancements and new features, based on [Customer Influence](#)

- Optimize functions in logistics and inventory
- Optimize functions in CRM and service
- Optimize functions in financial
- Enhance usability
- Enhance Microsoft 365 integration
- Incorporate intelligent ERP elements by SAP, such as enabling document templates for intelligent invoice scanning in SAP Business One
- Integrate SAP solutions adding value for SAP Business One customers
- Automate online banking (integration of payment gateways used at SAP)

Lifecycle management

- Optimize upgrade and installation processes
- Optimize data import functions

Feature value

- Increased attractiveness for new and installed base
- Solid core foundation for building vertical solutions
- Users enabled to consume core business processes across multiple platforms
- Simplification, greater customer and partner satisfaction, reduced TCO
- Latest versions of operating systems, database engines, or browsers used to apply innovations even faster in day-to-day business operations

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Web client

Extend functional scope

Feature

Extended business logic coverage and user experience

- Extended sales and purchasing coverage
- Service
- Financials
- Extended payments support
- Inventory management
- Project management
- Production
- Human resources
- Administration and setup
- New Horizon theme elements from SAP

Analytics, reporting, and printing

- Extended analytics
- Additional reporting content
- Design capabilities
- Support printing

Integration and extensibility

- Providing extensibility capabilities
- Extended Microsoft 365 integration
- Extended Outlook 365 integration
- Extended Microsoft Teams integration

Feature value

- Extended target audience by providing increased functional coverage
- Extending market coverage
- Increased competitiveness
- Increased efficiency and productivity
- Reduction of TCO

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Globalization

Legal compliance and localization enhancements

Feature

- Legal compliance and localization enhancements generically or specifically (legal requirements, business practice, statutory reporting, and default values)
- Localization expansion to potential new markets, increased number of supported languages, and harmonized functions across localizations
- Electronic documents framework enhancements and country-specific built-in content using the electronic file manager add-on, electronic documents service, and integration framework
- Electronic documents service component extensions
- Integration and leveraging of existing cloud services from SAP for legal adaptations, such as SAP's digital compliance platform
- IFRS
- Germany – ELSTER: Adoption of the new ERiC versions
- Israel – Electronic invoice and digital signature support
- Israel – Purchase tax on document rows introduction
- Israel – Maarechet 1000 and Mivzak reporting changes
- India – A/P down payment request support for TDS deduction
- Poland – Electronic invoice 2024 (KSeF)
- France – Electronic invoice support
- Spain – Support for new tax for one-use plastics
- Argentina – Electronic invoice enhancements
- Singapore – Submission of GST return

Differentiating factor

- Helping businesses to run worldwide, increased relevance for new customers and installed base
- Facilitating customers in meeting their legal obligations (accounting, tax, invoicing, and reporting); legal compliance
- Increased localization competitiveness that helps to win in the cloud globally; significant competitive advantage; and differentiating factor
- Increased customer and partner satisfaction, merged back-legal add-ons that reduce costs, lower TCO
- Higher reporting flexibility for IFRS, U.S. GAAP, group reporting, or any local legal reporting requirements

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Extensibility

Extend SAP Business One with fully integrated solutions horizontally and vertically

Feature	Feature value
<p data-bbox="94 396 471 428">SAP Business One core</p> <ul data-bbox="94 449 611 592" style="list-style-type: none"><li data-bbox="94 449 611 485">▪ Enhancement of service layer API<li data-bbox="94 499 458 535">▪ Web client extensibility<li data-bbox="94 549 445 585">▪ Event service support	<ul data-bbox="1574 396 2453 694" style="list-style-type: none"><li data-bbox="1574 396 2453 478">▪ Significantly expanding the addressable market by providing a robust API for both SQL and SAP HANA<li data-bbox="1574 492 2453 571">▪ Optimizing partner support by realizing requirements for flexible integration in customer projects<li data-bbox="1574 585 2453 694">▪ Enabling solutions to run smoothly in the cloud by detaching the applications from the underlying infrastructure

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Integration framework

An extremely strong platform

Feature

Integration framework

- Mapping between DI API and service layer
- Flexible event-handler mechanism to replace event sender
- Support for advanced user authentication
- Security enhancements

Feature value

- Straightforward and extremely flexible capabilities that make the integration framework the key differentiator for SAP Business One, turning SAP Business One into a robust business platform
- Helping ensure integrations with little or no effort to other SAP and third-party applications
- Extending system and business network capabilities
- Data provision to any external system and data consumption from any external provider

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Mobile apps for the enterprise

Mobilize your workforce to support flexibility and efficient processes

Feature

- Service app that allows ticket creation
- Use of native device capabilities of latest devices
- Evolving service layer into a platform for building innovative mobile solutions for verticals

Feature value

- Significant expansion of the addressable market, driving adoption
- Increased workforce productivity
- New collaboration methods and business practices with an intuitive and simplified user experience

This is the current state of planning and may be changed by SAP at any time.

Planned innovations: Cloud

Simple consumption and best scaling

Feature

SAP Business One Cloud, SAP-hosted option

- Support for advanced user authentication
- Security enhancements

SAP Business One Cloud, partner-hosted option

- Enhanced tools in SAP Business One Cloud 1.1 cloud control center focusing on hosting partners, improvements for user experience, monitoring, and performance
- Support for identity and authorization management (IAM) in SAP Business One Cloud 1.1 (for example, logging into SAP Business One with external IDP using OIDC)
- Lifecycle management optimization (applying hot fixes, software component registration, service unit setup, maintenance window setup)
- Optimized partner support user functionality
- Security enhancements

Feature value

- Technology that scales with the business and provides a competitive advantage
- Attractive offering for an increasing number of companies looking for cloud deployment
- Easier and affordable deployment; reduction of TCO
- Better tools for hosting partners
- New opportunities for partners to grow their business
- Short time from purchase to delivery
- Flexible, simple, and intuitive solutions for running an efficient business and managing hosting operations

This is the current state of planning and may be changed by SAP at any time.
